

CALL FOR PAPERS

Strategies to effectively design and manage pharmacy benefits are becoming increasingly important, as the implications of these decisions affect health spending and health outcomes across large populations.

Our goal is to attract research that examines the impact of formulary management strategies on the utilization, cost, and quality of pharmacy services. Areas of particular interest include:

- Comparative Effectiveness Analyses of Drug Therapies
- Utilization Management Strategies (ie, prior authorization, step therapy, generic substitution, and quantity limits)
- Outcomes Research on Medicare Part D
- Formulary Development and Implementation Strategies
- Research on Adherence and Compliance
- Cost Sharing Strategies (ie, copays, coinsurance, CDHPs, HDHPs, etc)
- Cost Utility Analyses
- Economic Burden of Disease

Please submit manuscripts for this series through our online submission system at <http://mc.manuscriptcentral.com/ajpblive>. If you have questions or wish to speak to a member of the editorial staff, please call (609) 716-7777.
